Program Overview

The AHIMA and AAPC medical coding exam preparation program consists of 3 courses, and is self-paced; the program is designed to be affordable, comprehensive, and effective.

All course content was developed based upon research providing knowledge specific to passing the medical coding certification exams. This online program is appropriate for those planning to pursue the AHIMA Certified Coding Associate (CCA), AAPC Certified Professional Coder (CPC), or other medical coding credentials.

Join our free foundation course: Introduction to Medical Terminology (save \$250) - unlimited access time 24 hours a day from anywhere.

The Certified Coder Academy Exam Program is available any-time from anywhere, and allows you to study from home or any other place with a computer and Internet connection. Learn in your own professional private and secure online course management system just like college students.

Get your coding certification fast or take the time you need, depending on your experience level and learning style; this coding program is completely personalized, self-paced, and offers unlimited access time 24 hours a day 7 days a week.

- User friendly course management system
- Program Verification Letter
- Certificate of Achievement
- Less expensive than similar programs
- Follows AHIMA and AAPC guidelines and standards
- Quiz and test questions like the real exams
- Instant feedback with explanations
- Numerous bonus learning resources
- Works on any computer and browser
- Unlimited access time to all courses
- No DVDs, CDs, or software to download or install

Certified Coder Academy

Course Descriptions

Introduction to Medical Coding

This course introduces the official coding guidelines and procedures covering the most common and complex International Classification of Diseases, Ninth Revision; Clinical Modification (ICD-9-CM) diagnostic coding issues; covers basic procedures, nomenclature, categories, and evaluation & management services of the American Medical Association (AMA) Current Procedural Terminology (CPT) coding system; includes access to an ICD-9-CM searchable database for references and additional practice. This course will also present an overview of the Healthcare Common Procedure Coding System (HCPCS) Level II.

Advanced Medical Coding CPT

This course provides in-depth and comprehensive coverage of the CPT coding system by section; covers all sections including surgery, anesthesia, radiology, pathology & laboratory, medicine, modifiers, and detailed correct coding procedures. Lessons are organized according to the official American Medical Association (AMA) Current Procedural Terminology (CPT) manual. Practice quizzes, and coding tips reinforce participant knowledge retention.

Advanced Medical Coding ICD-9-CM

This course provides in-depth and comprehensive coverage of the entire range ICD-9-CM codes; Lessons are presented according to the official World Health Organization (WHO) coding guidelines and standards. Practice quizzes, and coding tips reinforce participant knowledge retention; includes access to a complete and up-to-date ICD-9-CM searchable database for references and additional practice. Real life ICD-9-CM coding and diagnostic problems are presented with comprehensive solutions.
